

# The Illinois Contraceptive Coverage Act (H.B. 5576)

Representative Elaine Nekritz • Senator Toi Hutchinson

## Women are being denied the promise of the Affordable Care Act.

Illinois has the opportunity to clarify the law to improve access to the full range of contraceptive options for all people with health insurance.

### The Comprehensive Contraceptive Coverage Act:

- ✓ **Guarantees coverage without cost sharing for all FDA approved contraceptive drugs, devices, and supplies, including voluntary sterilization.**
- ✓ **Allows insurance companies to limit coverage only when two or more products have the same active ingredients and safety profile.** This ensures access for women while allowing insurance companies to manage costs.
- ✓ **Prohibits the use of so called “reasonable medical management” techniques** which can delay or even prevent access to the most effective birth control options
- ✓ **Requires an accessible and timely waiver process to access birth control methods not covered by a plan**, which ensures health plans respect the decisions made between health care providers and their patients (this process is already required by the ACA)
- ✓ **Requires insurance companies to cover birth control prescriptions for up to 12 months at one time**, which has been shown to decrease costs for health insurance companies and decrease rates of unintended pregnancy

- ✗ HB5576 **does not** force religious organizations, religiously affiliated nonprofits, or closely held corporations to cover birth control. These employers maintain the right to request an exemption from the requirement to cover birth control under the ACA and the Supreme Court's decision in the Hobby Lobby case.
- ✗ HB5576 **does not** change the requirement for health insurance to cover emergency contraception. The ACA already requires that insurance companies provide this coverage for women when they have a doctor's prescription.

**Building on state and federal law, H.B. 5576 has the potential to reduce the number of unintended pregnancies and improve birth outcomes by guaranteeing reliable, affordable access to birth control for all people in Illinois.**
