FOOTNOTES

RV* Hib*

Administering a third dose at age 6 months depends on the brand of Hib or rotavirus vaccine used for previous dose.

COVID-19**

Number of doses recommended depends on your child's age and type of COVID-19 vaccine used.

Flu†

Two doses given at least 4 weeks apart are recommended for children age 6 months through 8 years of age who are getting an influenza (flu) vaccine for the first time and for some other children in this age group. The flu shot should be received yearly.

RSV*

Your child might need an RSV vaccine. Talk to your doctor or health care provider for more information.

DISCLAIMER: Dosages and Vaccinations required are as presented on the CDC's recommended infant vaccination schedule. Contact your health care provider or visit <https://www.cdc.gov/vaccines> for more information.
